

2012 Program Application

You are invited to participate in an exciting hands-on engineering and technology program where community college and four-year college students work together on real world projects for NASA, The Connecticut Children's Medical Center, Kaman Aerospace, Hamilton Sundstrand and other major Connecticut manufacturing companies. To participate, you must attend the Winter Intersession Program, which will be held from **January 2, 2012 through January 18, 2012**, at the University of Hartford. You will learn project planning and management, leadership, teamwork, behavioral diversity skills and networking during the intersession. In addition, teams will be identified and assigned their project along with a faculty and industry mentor. Teams will meet and conduct research (100 hrs) during the spring semester, culminating in an oral presentation as well as a final report due by June 1, 2012.

Please send or email your completed application **and a one (1) page, required essay** on why you would like to participate in the program by no later than **December 10, 2011** to:

John Birch
 Executive Director, LSSL
 c/o The Birch Group
